

Made for general use, no need of professional electronic training or knowledge.

With digital amplifier helps find digital signal source more easily.

High sensitivity

SH-055DV High sensitivity with Analog / Digital switch

Superior sensitivity

SH-055DRV For longer detecting distance

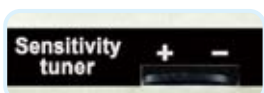

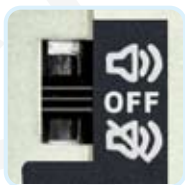

Applied with fuzzy scanning technology to detect peeping cameras, tapping, cellular phones, satellite phone and other radio frequency devices. Our detectors surely avoid being peeping or tapping to protect privacy or protect information being disclosed secretly.

SH-055D series have installed with unique **Analog / Digital selection switch**. The new digital amplifier will heighten the indication of the digital signals of Bluetooth, WLAN, Wi-Fi, cellular phone and Digital Spread Spectrum wireless products, etc.

Specially designed for easy and simple use, which does not require complicated installation or any professional knowledge.

Functions:

- Easy to distinguish analog and digital signals.
- 3 Levels indication: 3 LEDs will light from **Level 1** to **Level 2** to **Level 3** indicating the strength of detected signal.
- Audible alarm: The alarm will change from **Slow** to **Rapid** indicating the strength of detected signal.
- Vibration warning mode: SH-055DV and SH-055DRV have **Vibration** warning mode for detection without other's awareness.
- Earphone output: User can detect by earphone hearing without others' awareness.
- Superior sensitivity: SH-055DRV have the superior sensitivity for longer detecting distance. They can detect 10mW 2.4GHz wireless camera over 20 feet. None of other detectors is able to compare with.
- Sensitivity tuner: An adjustable sensitivity tuner allows you to scan variable distance and can eliminate the environment interference (background noise).

Made for general use, no need of professional electronic training or knowledge.

■ Features:

- Sensitivity controller can adjust working range to find signal source.
- 100% legal use in all the world.
- New digital amplifier provides stronger indication of digital signal by setting the A-D switch at D.
- Have same detecting ability without pulling out the antenna.
- Low power consumption for long time use.
- With belt clip for detection without holding the detector in hand.

■ Applications:

- Hospitals, medical centers or intensive care unit that forbidden cellular usage.
- Office, factory, cinemas, theaters, concerts, museums or art galleries that prevent video body bugs.
- Military or government premises that cellular phone is forbidden.
- Offices, restaurants or any commercial premises that would like to shun away cellular or RF disturbance.
- Detect peeping camera in shopping mall toilet, school toilet, locker room and fitting booth, club house, hotel etc.

■ Specifications:

No.	SH-055DV	SH-055DRV
Size	L 87 x W 55 x T 24 mm L 3.4 x W 2.2 x T 1"	
Weight (w/o battery)	about 70g	about 105g
Power	3V DC (AAA/UM-4 battery x2)	
Detecting Frequency	50 MHz ~ 6.0 GHz	
Warning mode 1	Audible alarm and 3 LEDs	
Warning mode 2	Vibration and 3 LEDs	Vibration and 3 LEDs
Warning mode 3	Silent, 3 LEDs and earphone output	
Sensitivity Tuner	Eliminate the environment interference (noise)	
Detecting Distance	(regular 10mW camera)	
5.8GHz Wireless camera	up to 2 feet	up to 8 feet
2.4GHz Wireless camera	up to 8 feet	up to 20 feet
2G Cellular phone (set at A)	up to 20 feet (LED blink only)	up to 40 feet (LED blink only)
2G Cellular phone (set at D)	up to 30 feet (with Audio alarm)	up to 50 feet (with Audio alarm)

* Specification may change without notice.

**OEM/ODM
are welcome**
